

# Automated Quality Assurance System for Clinical CT Systems

**Client:** Prof. Tim Szczykutowicz, Dept. of Radiology at UW School of Medicine & Health

**Advisor:** Prof. John Webster, Dept. of Biomedical Engineering

**Team Leader:** Heather Shumaker

**Communicator:** Connor Ford

**BPAG & BWIG:** Rachel Reiter

**BSAC:** Sam Brenny

# Client Information

## Dr. Tim Szczykutowicz

- Assistant Professor
  - UW School of Medicine, Radiology, Medical Physics, Biomedical Engineering
- Undergrad in physics, Masters and Ph.D. in medical physics
- Research activities include
  - Optimizing CT scan protocols, patient dose monitoring, and developing protocol management methodologies [1]

# Problem Statement

## CT QA REPORT

Table 1: List of test performed and the tolerance.

Test	Tolerance
1. Laser alignment	±0.5 mm
2. Laser collimation	±0.5 mm
3. Laser focus	±0.5 mm
4. Laser beam flatness	±0.5 mm
5. Laser beam divergence	±0.5 mm
6. Laser beam position	±0.5 mm
7. Laser beam diameter	±0.5 mm
8. Laser beam intensity	±0.5 mm
9. Laser beam stability	±0.5 mm
10. Laser beam uniformity	±0.5 mm

Table 2: Summary of test performed.

Test	Result	Remarks
1. Laser alignment	Pass	
2. Laser collimation	Pass	
3. Laser focus	Pass	
4. Laser beam flatness	Pass	
5. Laser beam divergence	Pass	
6. Laser beam position	Pass	
7. Laser beam diameter	Pass	
8. Laser beam intensity	Pass	
9. Laser beam stability	Pass	
10. Laser beam uniformity	Pass	

4. LASER/RADIOGRAPHY/TOMOGRAPHIC CONSISTENCY  
Laser alignment and collimation tests have been performed according to the tolerance specified in the table above. Additionally, the laser beam diameter, position, divergence, focus, flatness, intensity, stability, and uniformity tests have been performed and the results are within the tolerance specified in the table above.

Figure 1: Looking into the scanner from the front side of the scanner. The red laser beam is visible on the right side of the scanner. The laser beam is used to align the scanner components and to check the alignment of the scanner.

# Background

## Computed Tomography (CT)

- Narrow x-ray beam rotated around patient
- Sensor opposite of x-ray picks up signals
- Cross-sectional images (slices) are created from signals [2]

## Quality Assurance (QA) Testing

- Scanner is tested daily, monthly, yearly basis
- QA testing ensures the scanner is functioning properly
- Multiple tests conducted to measure individual functions
- Reports generated from testing, sent to technicians for repair [3]

# Motivation

---

- To expedite testing and optimize the reporting process
- To create a universal and standard reporting system
- Improve communication between QA and service technician
- CT needs to be properly working so that the right dose can be applied
- Create database & view scanner trends

# Design Specifications

---

- Performance:
  - Process CT images
  - Create PDF reports using LaTeX
  - Write to database/view trends
- Accuracy:
  - No crashes/bugs
  - Pop-up windows to verify calculations
- Ergonomics:
  - Intuitive user-interface
- Program Format:
  - Well-commented
  - Modular
- Universal Distribution:
  - Packaged into executable
- Standards:
  - Outline testing procedures

# Commercially Available Competing Designs

## Image Owl [4]

- ✓ QA database & trending
- ✓ Cloud-based service
- ✓ Mobile App
- ✗ High cost
- ✗ Expensive Customization

imageOwl

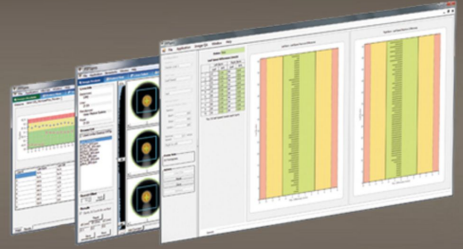

COMPLETE, CONVENIENT, ACCURATE AND INSIGHTFUL DIAGNOSTIC IMAGING AND RADIOTHERAPY QA SOLUTIONS

<http://www.imageowl.com/>

## PIPSpro [5]

- ✓ Performs image analysis & calculations
- ✓ QA database & trending
- ✓ Provides quantitative analysis of scanner
- ✗ High cost
- ✗ Complexity requires training to use
- ✗ Testing protocols not included in reports

**PIPSpro Software**  
**True Leaf Speed QA**

True Leaf Speed QA, Not Just Qualitative Results

## Section 2: Safety

1.Scanner speakers allow you to hear patient lying on couch?

yes	no	N/A
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

2.Intercom works and has a volume set to allow patients to hear coaching instructions?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

3.X-ray warning labels present in control room?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

4.X-ray warning label present on scanner?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

5.X-ray on light works on control panel?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

6.X-ray on light works on scanner?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

7.X-ray on light works outside room?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

8.Scatter information is available to staff working with scanner?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

9.Disable couch movement button works?

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
--------------------------	--------------------------	--------------------------

10.When disable couch movement button is pressed, couch is left in a state movable by hand?

Safety (5)	5/5	5	5/5	5	5/5	5
Cost (5)	5/5	5	5/5	5	5/5	5
<b>Total (100)</b>		76		28		95

# Proposed Design: Master GUI

## **Ease of Use & Speed**

- Easy to switch between tests
- User friendly, intuitive

## **Degree of User Interaction**

- Automatic calculations
- Text file exportation

## **Modularity**

- Future adjustments all in same GUI

## **Additional Features**

- Easy to package & distribute software
- Database for scanner trending

# Future Work

---

- Continue to add functionality to GUI
  - Develop back-end code to input and manipulate images and data
- Improve look and user interface
- Improve ergonomics
- Standardize testing protocols with client
- Work with LaTeX
- Trial runs with client
- Packaging for distribution

# Acknowledgements

---

We would like to thank:

- Prof. Tim Szczykutowicz
- Prof. John Webster
- Assistant Prof. Jess Miller
