

Stair Chair: BME 200/300

Dates: 11/21/2024-11/28/2024

Client: Mr. Daniel Kutschera, PT

Advisor: Dr. James Trevathan

Team:

Matt Sheridan (Leader)

Dan Altschuler (Communicator)

Cody Kryzer (BSAC)

Luke Rosner (BWIG)

Abi Conners (BPAG)

Problem Statement

Create a mechanical device that temporarily handicapped patients can use to ascend and descend 3-5 stairs. The device should be inexpensive to fabricate, as compared to competing powered stair lifts, and be easy to set up and take down, both inside and outside the patient's home.

Brief Status Update

The device is nearly finished and will be ready for the Monday after break. The team has plans to test the device once it is all complete and then it will be time for the team to prepare for the final poster presentation.

Weekly Goals and Accomplishments

- Team
 - Continued assembly of the final design
- Matt Sheridan
 - Completed more water jetting of the base plate and helped with the full assembly
- Dan Altschuler
 - Wrote the protocols and helped with the final assembly
- Cody Kryzer
 - Helped attach the pulleys to the final design
- Luke Rosner
 - Completed water jetting of the base plate

Upcoming Goals

- Team
 - Begin testing and prepare for the final presentation
- Matt Sheridan
 - Complete the assembly and write out the fabrication plan
- Dan Altschuler
 - Start testing and work on filling in the testing section of the final report and poster
- Cody Kryzer
 - Help with testing and write protocols
- Luke Rosner
 - Help with testing and prepare for the final presentation
