

Quad Rat Vitals Monitor

Client: Dr. Alex Converse

Advisor: Dr. Tom Yen

Team:

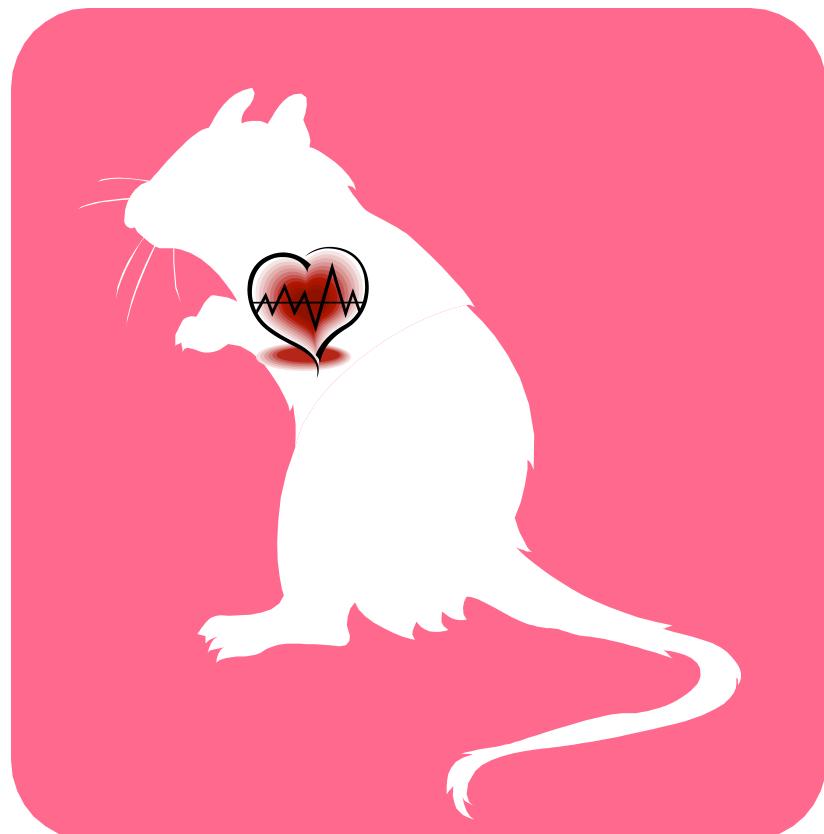

Jack Ho

Nathan Werbeckes

Joseph Yuen

Guest Starring:

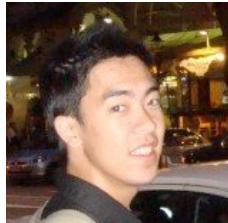

Kuya Takami

Problem Statement

- Vitals for anesthetized rats during PET imaging
 - Heart rate (200-500 bpm)
 - Rectal temperature (93 – 100° F)
 - Respiration rate (20-30 bpm)
- Current oximeter is designed for “small animals”
 - Inaccurate at faster heart rates
- Current devices too expensive
 - Budget = \$4,000 USD

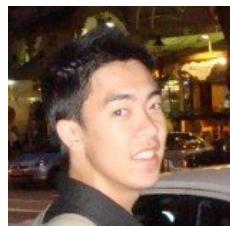

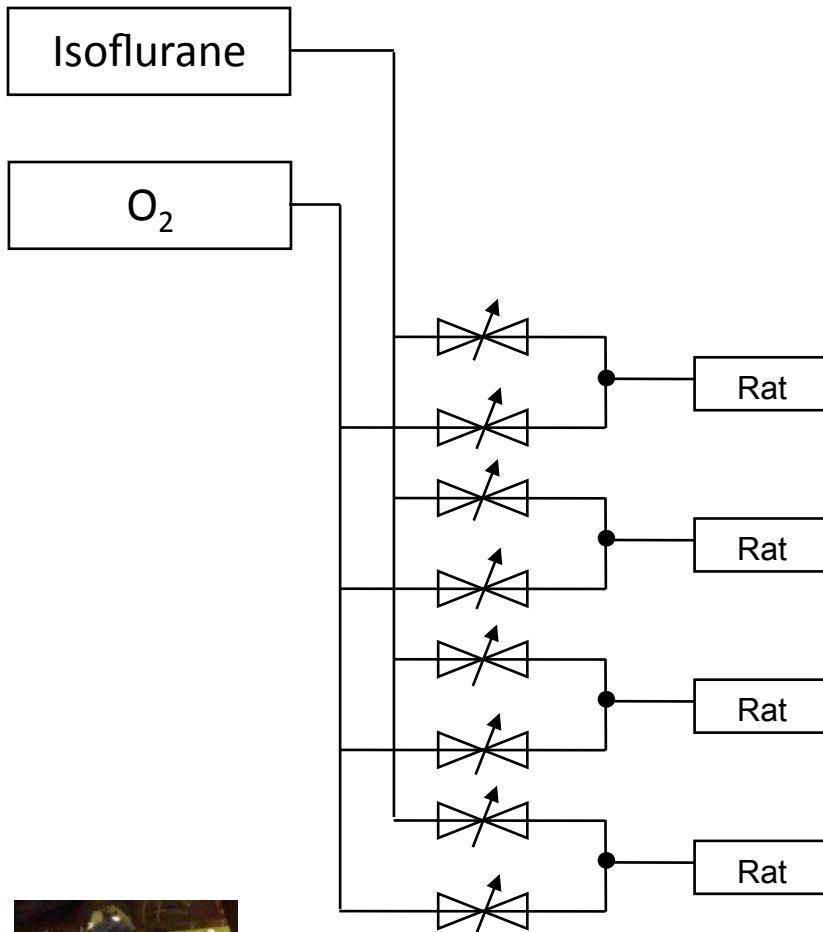

Jack Ho
Team Leader

Problem Statement : Background Info : Design : Future Work

Quad Adjustable Isoflurane Delivery*

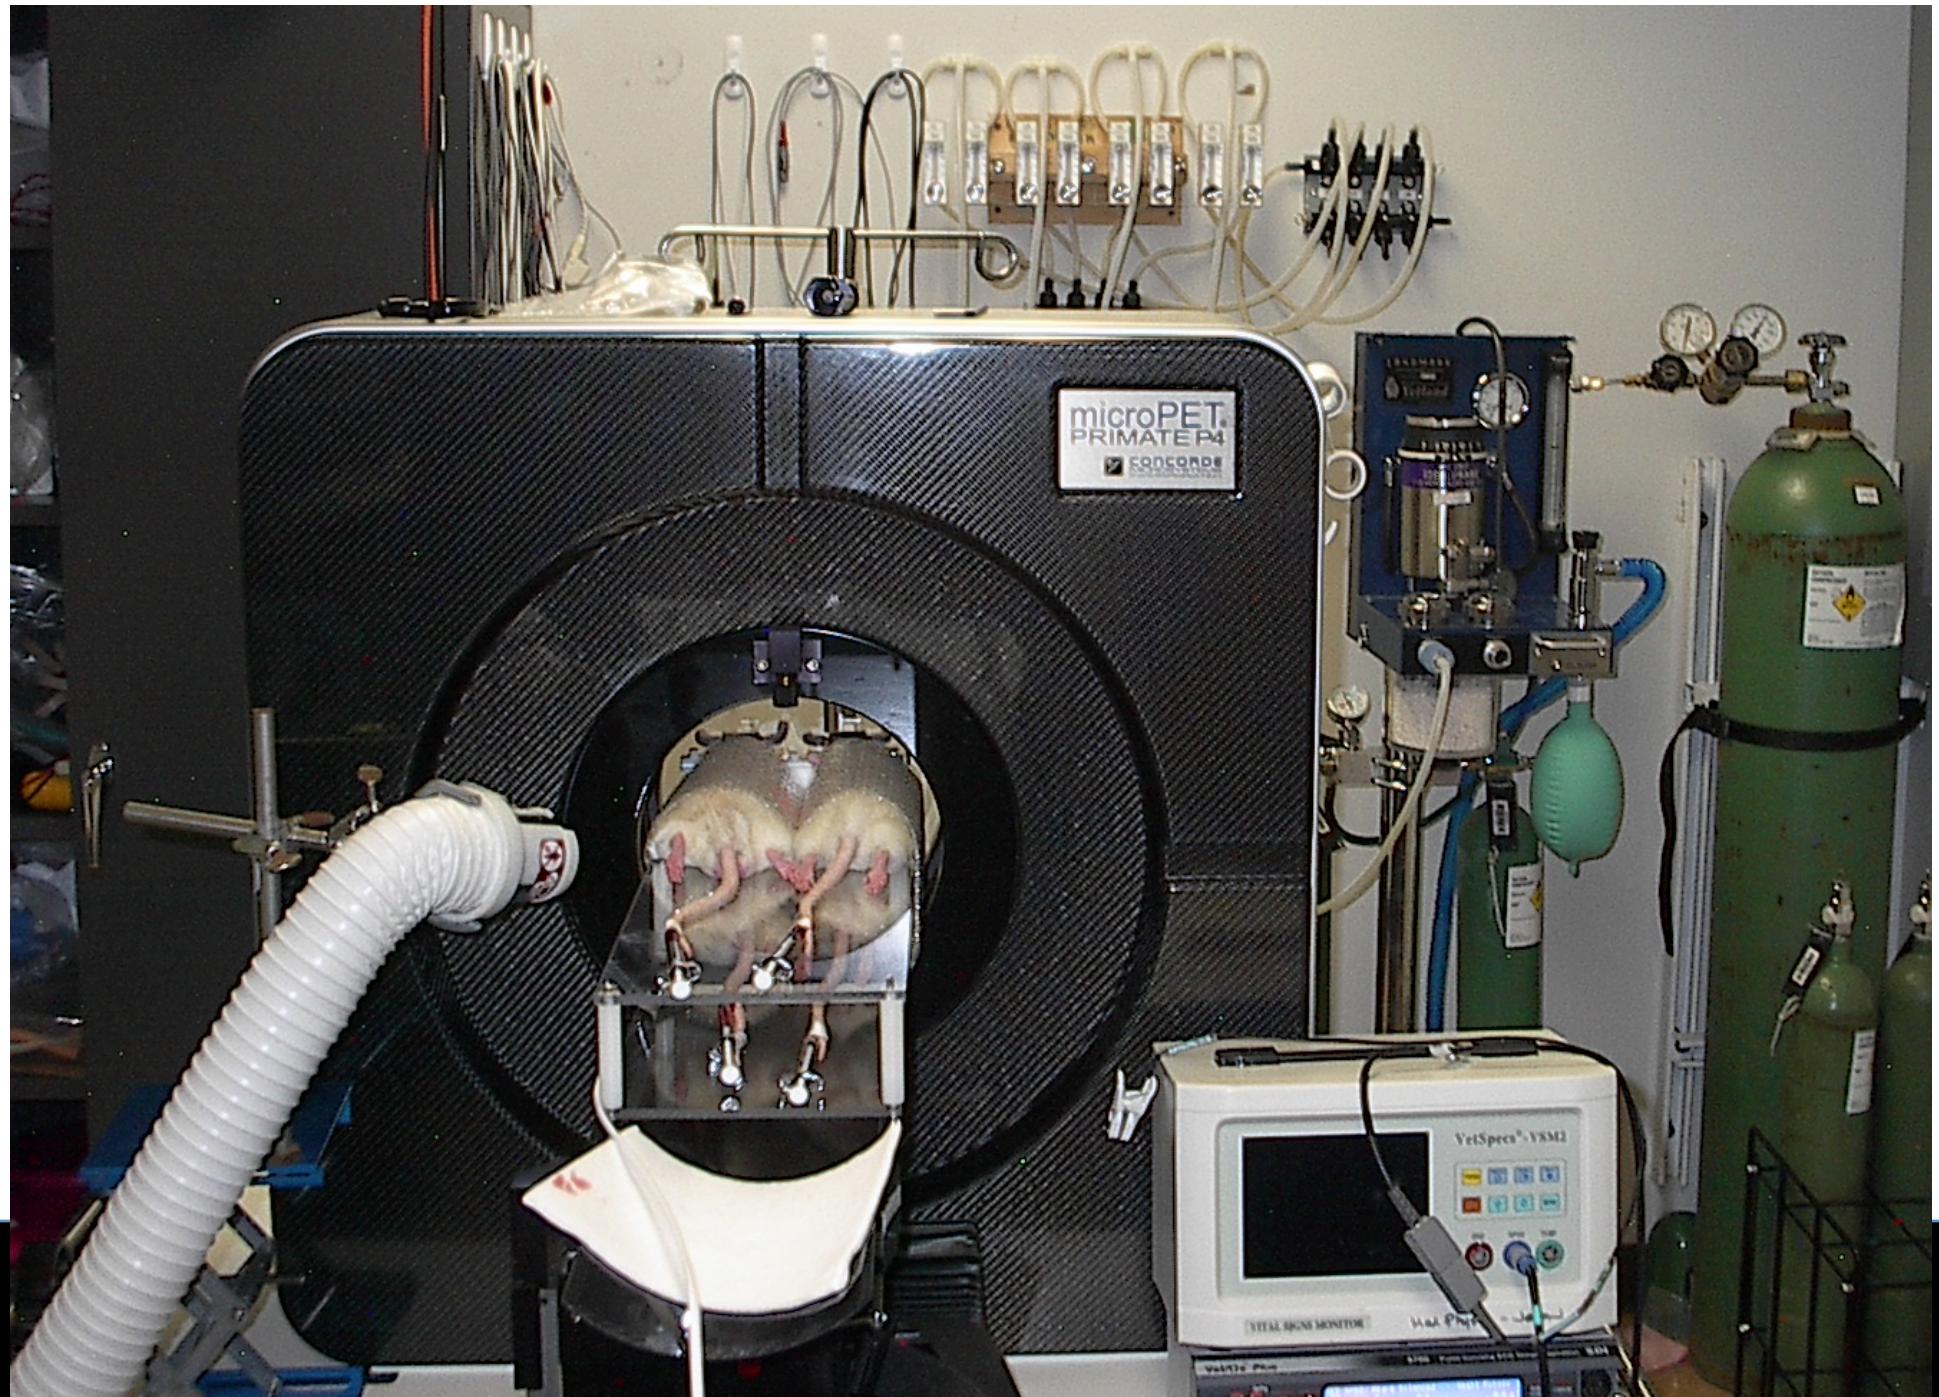

Jack Ho
Team Leader

Problem Statement : Background Info : Design : Future Work

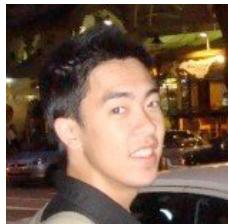

*Slide by Dr. Alex Converse

Current Devices

- Veterinary Oximeters
 - Nonin, Bionet, etc.
- Starr Life Sciences
 - MouseOx
- Expensive

Jack Ho
Team Leader

Problem Statement : Background Info : Design : Future Work

Last Semester's Final Design

- Decided to buy sensors
(FSR, pulse-ox,
thermistor)
- Design and build circuit
elements
- Integrate and display
with LabVIEW

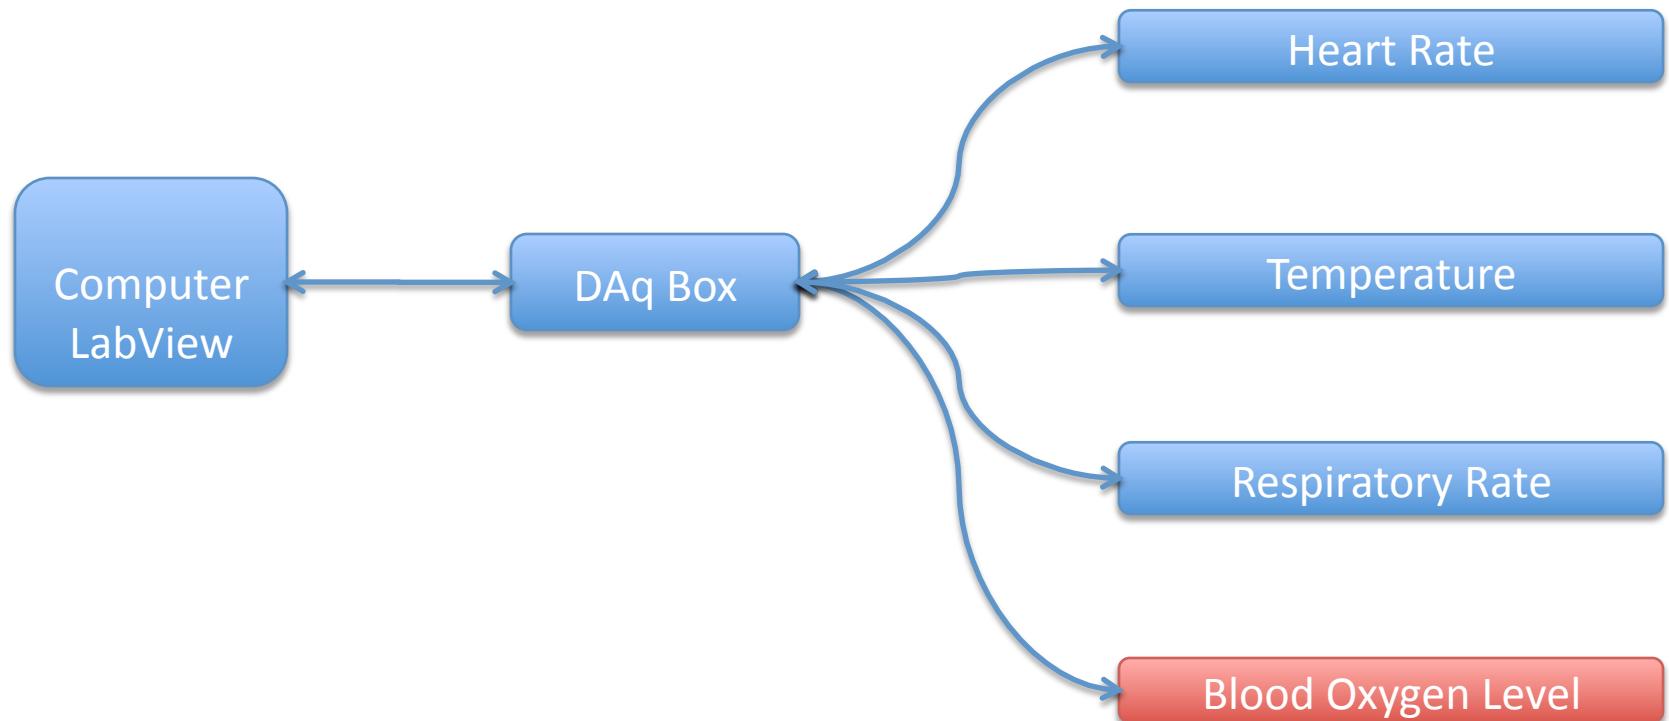

Nate Werbeckes
Communicator

Problem Statement : Background Info : Design : Future Work

Final Design

Nate Werbeckes
Communicator

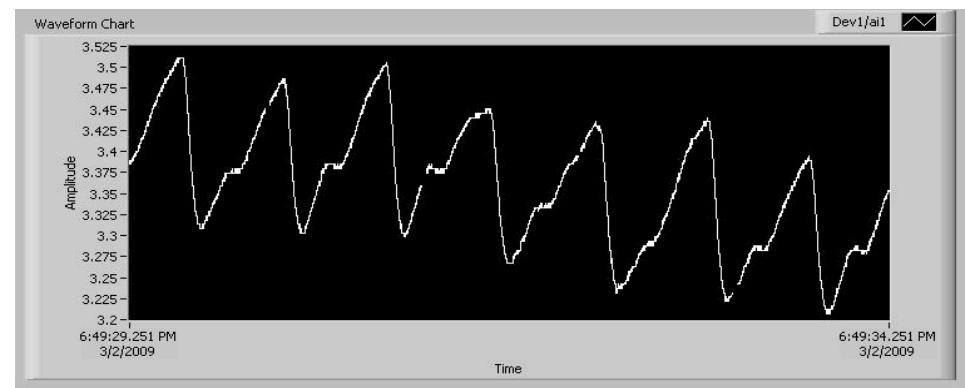

Problem Statement : Background Info : Design : Future Work

Heart Rate

- Pulse-Ox clip
- Transimpedance, differential, & non-inverting amp
- Process with peak detection algorithm
- Display in LabVIEW
- Working on: peak detection accuracy

Nate Werbeckes
Communicator

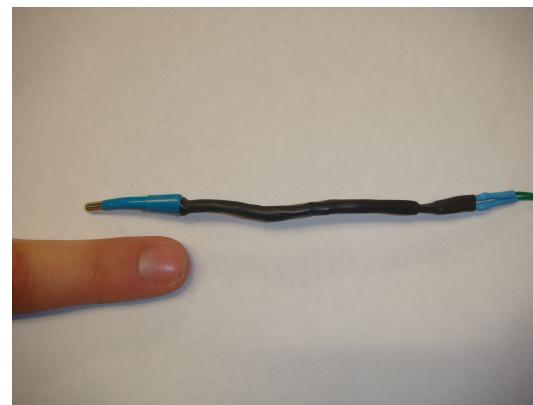

DESIGN : Heart Rate : Temperature : Breathing Rate

Temperature

- Oral Thermometer from Walgreen's
- Voltage divider & non-inverting amp
- Heat-shrinking plastic
- Display and integrate in LabVIEW
- It works!

Joseph Yuen
BSAC & BWIG

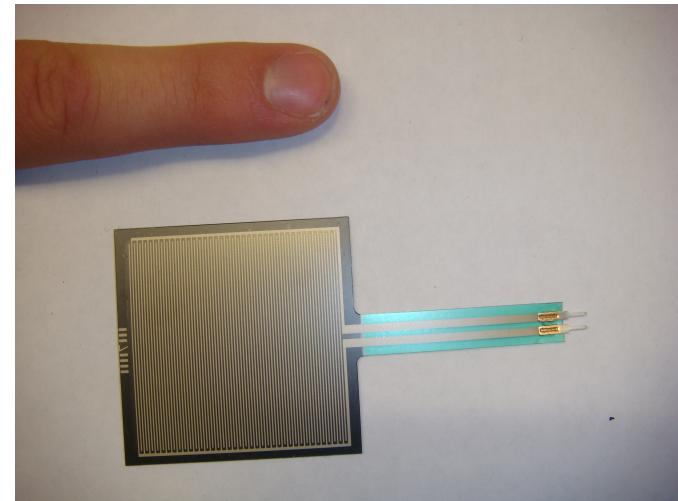

DESIGN : Heart Rate : Temperature : Breathing Rate

Breathing Rate

- Force Sensing Resistor (FSR)
- Voltage divider
- Place underneath rat
- Display and integrate with LabVIEW
- Needs to be tested

Joseph Yuen
BSAC & BWIG

DESIGN : Heart Rate : Temperature : Breathing Rate

Future Work

- Test FSR breathing rate monitor with rat
- Choose most accurate peak detection algorithm
- Integrate and display all information in LabVIEW
- Create full scale model for four rats simultaneously

Joseph Yuen
BSAC & BWIG

Problem Statement : Background Info : Design : Future Work
